Full-Stack Developer with experience building scalable enterprise applications using React/Next.js, NestJS, and Spring Boot. Skilled in frontend and backend development, RESTful APIs, and microservices architecture, with experience delivering solutions for insurance, healthcare, and LMS platforms.

Work Experience

Senior Software Developer

Soilfish Co., Ltd.

07/2023 - Present

Cost Containment Management (CCM)

- Developed RESTful APIs using **Java Spring Boot** to power the core **Claim Eligibility module**, handling complex business logic and Oracle Database integrations.
- Implemented** core algorithms to validate medical claims, checking coverage conditions, waiting periods, and ICD10/SIMB logic to prevent invalid payouts.
- Refactored legacy code and wrote comprehensive **Unit Tests**, significantly reducing technical debt and improving overall system maintainability.
- Collaborated closely with Business Analysts and QA engineers to translate business requirements into scalable technical solutions, ensuring accurate and timely feature delivery.

WCF Digital Project

- Spearheaded full-stack development for two core systems (PRH and Registrar Management), utilizing **Next.js** and **Tailwind CSS** for the frontend, and **Java Spring Boot** for the backend.
- Built a standardized, reusable UI component library, significantly accelerating frontend development and ensuring design consistency across both systems.
- Architected core API contracts** between the frontend and backend services, ensuring seamless data flow, high integrity, and secure communications.
- Optimized data retrieval processes and database queries to efficiently handle large-scale datasets, **maintaining high system performance and stability under heavy workloads**.

Academy Management System (AMS)

- Delivered a comprehensive **Learning Management System (LMS)** comprising two distinct domains: a Back-Office Admin Portal and a Learner Portal for insurance agents.
- Designed and developed** frontend interfaces for both portals utilizing **ReactJS** and **Material-UI**, ensuring an intuitive and user-friendly experience for both administrators and agents.
- Architected highly scalable backend microservices using NestJS**, efficiently managing complex workflows for course administration, user enrollment, and real-time progress tracking.

Software Developer

Additional Projects (Freelance)

09/2023 - 01/2024

Adela Clinic Website

- Developed a modern, high-performance website utilizing **Next.js** and **Tailwind CSS**, delivering an engaging user experience to showcase clinic services.
- Automated the deployment pipeline** using CI/CD integration with Vercel, minimizing manual errors during the deployment process.

Front-End Developer

Base Learnx Co., Ltd.

02/2023 - 07/2023

SeenAbility

- Developed the frontend for an HR assessment platform using **ReactJS** and **Bootstrap**, helping organizations

evaluate candidate culture fit and drive internal employee development.

- **Refactored core frontend modules**, significantly enhancing application performance, code maintainability, and modularity.

Skillkamp (Landing Page)

- Built a modern, high-performance landing page for the Skillkamp campaign using **Next.js** and **Tailwind CSS** to effectively present promotional content and campaign details.

Leader Board (88 Sandbox)

- Developed a dynamic leaderboard interface for the 88 Sandbox campaign using **React**, **TypeScript** and **Tailwind CSS** to track and display participant scores and rankings.

Front-End Developer

Forviz Co., Ltd.

07/2022 - 01/2023

Venue (Interactive Directory Kiosk)

- Developed an interactive kiosk application utilizing **ReactJS**, **Material-UI** and **Maptalks** to display mall directories and store locations.
- **Integrated a custom indoor navigation algorithm** to calculate the fastest path between stores, delivering a seamless, Google Maps-like guided routing experience for mall visitors.

Visitor Management System (SupalaiSABAI)

- **Engineered Go-based backend RESTful APIs**, specifically designing and implementing core endpoints to efficiently manage visitor check-in and check-out records.

Full-Stack Developer (Internship/Co-op)

Intellect Network Web Co.,Ltd.

11/2021 - 06/2022

Wiplux (SmartPDU) IoT Web Application

- **Engineered an end-to-end full-stack application** serving as a comprehensive monitoring and control interface for Wiplux SmartPDU IoT devices.
- Developed a dynamic frontend utilizing **Angular** and architected robust backend RESTful APIs and service logic with **Node.js**.
- **Integrated the MQTT protocol** to establish real-time, bidirectional communication between hardware devices and the Node.js backend, ensuring instantaneous status updates and reliable device control.

Skills

Frontend:

- React, Next.js, TypeScript, JavaScript, Angular, Tailwind CSS, Material-UI, Bootstrap

Backend & Architecture:

- Node.js, NestJS, Java Spring Boot, Go, RESTful APIs, Microservices

Databases & ORMs:

- SQL (MySQL, PostgreSQL), Oracle Database, Hibernate, TypeORM

API Tools:

- Postman, Swagger (OpenAPI)

Tools/DevOps:

- Git, CI/CD(Vercel), Jest (Testing Frameworks)

IoT/Specialty:

- MQTT

Education

Bachelor of Engineering (Computer Engineering)

Kasetsart University, Kamphaeng Saen Campus

04/2022
